## Display View in C/C++ IDE [message #1772273]

**Abhishek Nath**

Junior Member

**Messages:** 1

**Registered:** September 2017

Hi,

I'm new to Eclipse for C/C++ developer IDE.

I have a query:

Does 'Display View' (in Java Developer IDE) window available in C/C++ developer IDE?

If so, then how could i add it.

If not then, is there any mechanism or functionality which does exactly the same thing?  
(displays the result of evaluating an expression in the context of the current stack frame)

用戶需求

In other words, I want a mechanism equivalent to 'Command Window' in Visual Studio.

Please help me.

Thanks
